Support | when you need it the most.

Support when you need it the most

Specialist Healthcare Seating Range

Primacare are excited to show you our latest range of Specialist Seating products.

We have now produced over 100,000 chairs and this experience is evident in the quality of manufacturing and the flexibility and functionality of the designs shown.

Our primary aim is to balance the challenges of comfort and pressure management with posture control and individual independence and the result is this new range of chairs, from the relatively simple design up to the most complex needs.

Support | for your client.

Primacare have a broad range of innovative products for your client, to provide comfort and support over a long period of time if necessary.

With such an extensive range of products there must be a suitable chair because we start with simple porter chairs and ultimately offer chairs for users with the most complex needs.

Support | for you the professional

A range of practical support to help you understand, specify and introduce our products.

Whether you are a Specialist Seating assessor, an Occupational Therapist, a Tissue Viability expert or an interested carer, this brochure is a starting point to explain the functions and sizes of the chairs available. In addition the extensive range of seating solutions including pressure management and the large number of accessories and options will allow you to fully specify the correct chair.

primacare | always there

Pressure management

Many people discuss 'Comfort' and 'Pressure relief' and the subjects are inextricably linked.

If we can increase an individual's surface area contact between themselves and their chair then we spread their weight over a larger area, reducing the pressure on their body parts, including legs, bottom, arms and backs.

It is therefore CRITICAL to use a chair that has been measured and adjusted to the

size and shape of the individual. Correct Posture leads to maximising the contact area which in turn minimises pressure on the body parts.

Occupational Therapists and Specialists will advise repositioning every 2 hours and the use of significant tilt angles (up to 45 degrees) which can achieve

pressure reductions particularly in the pelvic area. However the highest pressure is found in the seating cushion area under the bottom and Primacare have 7 different seating arrangements to offer depending on the level of risk of pressure sores and ulcers.

2

Pressure management *mapping*

Primacare different seat cushion options have all been extensively tested using a pressure mat which contains 120 different pressure sensors over the seating area of a chair. Pressure Mapping is unique to the individual user, the type

of cushion and the relative position of the chair. However the mapping can give relative performance and a pressure map when comparing different cushions with the same user.

Please note that users with pressure relief concerns should seek the advice of an Occupational Therapist or Tissue Viability Specialist who can advise on the level of Pressure Relief required.

Female 9 stone Age 52
Coolgel Cushion

Male 15 stone Age 50
Primagel Cushion

Pressure management *seat options*

Visco *Medium Risk*

The Visco elastic heat sensitive layer is supported by high density Reflex foam.

Body heat moulds the visco layer around any high pressure areas and the result is a stable cushion giving good postural support.

Primagel *High Risk*

The cushion uses combustion modified high resilient foam with a profiled upper surface to increase pressure distribution, encasing a silicon gel sac, which dissipates pressure in high areas of loading.

Primagel+ *High Risk*

The Primagel+ cushion uses the Primagel cushion with an added layer of visco elastic heat sensitive foam.

FlatGel *High Risk*

The FlatGel cushion uses a Proprietary Silicon Polymer sheet over a high density reflex foam. The Gel has the same physical characteristics as human fat tissue and the softness stays unchanged at any temperature. The polymer is a solid which will not leak if punctured. It is Hypoallergenic – it does not contain latex or isocyanates and it is odourless.

Because of its stability with temperature changes this cushion offers excellent constant postural support over many hours.

CoolGel *High / Very High Risk*

The Coolgel cushion uses a Proprietary Silicon Polymer sheet over a high density reflex foam. The Gel has the same physical characteristics as human fat tissue and the softness stays unchanged at any temperature. The polymer is a solid which will not leak if punctured. It is Hypoallergenic – it does not contain latex or isocyanates and it is odourless. The Coolgel has circular discs of polymer which allows air to circulate between the cells to minimise heat and moisture build up. An even pressure distribution contours to the underlying surface so this cushion can be used all day and still retain its stability.

Air comfort *High / Very High Risk*

The air comfort cushion uses a combination of longer broad rubber webbing springs with a high density reflex foam seat cushion. This cushion surround an air cell which allows different air pressures and air volumes. This cushion easily contours around the higher protruding parts of the posterior to give an excellent even pressure distribution.

Alternating Air Cushion *High / Very High Risk*

The alternating air cushion uses an air pump to continuously inflate and deflate 6 dynamic air cells controlled on a 9minute 36second cycle.

At any one time 4 of the cells are inflated bringing pressure relief to the other areas. A 240V electrical supply is required for the pump which is usually positioned next to the chair.

Alpha | specification.

Alpha chair with optional lateral back cushion.

		16W	18W	20W
A	seat height	16"	18"	20"
B	seat width	16"	18"	20"
C	seat depth	18-22"		
D	back height	30"		
E	back angle	100-130°		
F	overall width	25"	27"	29"
G	overall depth	35"		
H	overall height	43-45"		
	weight capacity	25 stone		

Standard features

- Removable double seat cushion
- Manually adjusted seat angle with 4 positions (max 28°)
- Seat depth adjustable
- Pull out footplate
- 4 x swivel 4" diameter castors (2 x rear lockable)
- Ultima vinyl outer - Crib 5
- VP 4 way stretch fabric on seat and back cushions

Alpha | features and options.

Two section seat cushion, a 4" thick and 2" thick which allow the chair to have 2 different seat heights. The chair can also be specified with any of the Pressure reducing cushion options.

The seat rake angle can be adjusted with quick release plunger pins to give seat angles up to 28 degrees rake.

The chair comes as standard with 4" of seat depth movement, easily adjusted by 2 knobs on the underside of the seat.

The pull out footplate gives a comfortable position to rest the feet when using as a Porter chair.

The Back Angle Recline is operated by a handle which has a safety catch on the lever to help avoid accidental use of the recline function. The sturdy push handle can be positioned at 2 heights.

An optional footstool is available to create a comfortable relaxed seating position.

Alpha

The Alpha chair is an inexpensive solution to Portering needs but with many adjustable features to make this a comfortable all day chair.

The chair has adjustable seat depth, seat rake angle and back rest recline. The chair comes in 2 widths (18" and 20") with a double seat cushion as standard, allowing simple seat height adjustment.

The cushion materials are 4 way stretch vapour permeable fabric which is washable up to 95°C. The use of VP fabric enables the chair to be optionally upgraded with different pressure relieving cushions.

primacare | always there

Alpha Plus | specification.

Alpha chair with optional lateral back cushion.

		16W	18W	20W
A	seat height	16 - 20"	16 - 20"	16 - 20"
B	seat width	16"	18"	20"
C	seat depth	18-22"		
D	back height	30"		
E	back angle	100-130°		
F	overall width	25"	27"	29"
G	overall depth	35"		
H	overall height	43-45"		
	weight capacity	25 stone		

Standard features

- Removable seat cushion
- Manually adjustable seat angle up to 30 degree rake
- Seat depth adjustable
- Pull out footplate
- 4 x swivel 4" diameter castors (2 x rear lockable)
- Ultima vinyl outer - Crib 5
- VP 4 way stretch fabric on seat and back cushions

6

Alpha Plus | features and options.

Adjustable back cushions

The chair comes as standard with 4" of seat depth movement, easily adjusted by 2 knobs on the underside of the seat.

The pull out footplate gives a comfortable position to rest the feet when using as a Porter chair.

The Back Angle Recline is operated by a handle which has a safety catch on the lever to help avoid accidental use of the recline function. The sturdy push handle can be positioned at 2 heights.

An optional footstool is available to create a comfortable relaxed seating position.

Alpha Plus

The Alpha Plus is a supportive chair that reclines from a pivot point behind the knee.

This reclining seat is controlled by a smooth powerful gas spring which allows infinite positioning and a steep seat rake if necessary. It promotes a sense of security and relaxation.

The chair has adjustable seat depth and comes in 3 different widths. The chair seat cushion comes with visco pressure relieving foam as standard.

The cushion materials are 4 way stretch vapour permeable fabric which is washable up to 95 C. The use of VP fabrics enables the chair to be optionally upgraded with different pressure relieving cushions.

Affinity Air Comfort | specification.

		Petite	Compact	Standard
A	seat height	16"	18"	19"
B	seat width	18"	18"	20"
C	seat depth	18"	18"	20"
D	back height	27"	27"	30"
E	tilt / back angle	Single 25° / Dual 25° + extra 35°		
F	overall width	27"	27"	29"
G	overall depth	35"	35"	35"
H	overall height	39"	41"	44"
	weight capacity	20 stone		

Standard features

- Available with Single or Dual Tilt in Space rise and recline actions
- Ultimate vinyl outer Crib 5 with vapour permeable 4 way stretch fabric on all contact surfaces
- Extra long springs for added comfort
- Air cells in seat and back cushions provide infinite pressure adjustment

8

Affinity Air Comfort | features and options.

The Standard Affinity Air Comfort chair uses Single or Dual Tilt in Space Riser actions with a 20 stone weight capacity. Bespoke sizes and actions with Variable Angle Lift (VAL) are available at extra cost.

The Affinity chair comes as standard with a removable seat system and a removable back cushioning. This allows for easy access to the air cells

The Affinity chair shown has the high leg lift Tilt in Space actions but it can be specified with a conventional dual action which gives individual control of the legrest and back rest but with no tilt.

The 3 air cells are easily adjusted using the Hand held inflation bulb

Affinity

Air Comfort

The Affinity Air Comfort chair has been designed with maximum comfort in mind.

To achieve this there is a special seat construction with extra long springs to give more bounce. The seat and back cushions are made up with 3 individually controlled air cells to allow the occupant to personalise the comfort. The chair contact surfaces use 4 way stretch vapour permeable fabric which adds to the comfort of the chair.

This combination of long springs , soft foam , air cells and stretch fabric have been proved with pressure mapping to classify this seating as high risk.

Affinity Rise & Recline porter | specification.

		Petite	Compact	Standard
A	seat height	16"	18"	19"
B	seat width	18"	18"	20"
C	seat depth	18"	18"	20"
D	back height	27"	27"	30"
E	tilt / back angle	Single 25° / Dual 25° + extra 35°		
F	overall width	27"	27"	29"
G	overall depth	35"	35"	35"
H	overall height	39"	41"	44"
	weight capacity	20 stone		

Standard features

- Choice of Single or Dual Tilt in Space Rise and Recline actions
- Ultima vinyl Crib 5 with waterproof vapour permeable 4 way stretch fabric on all contact surfaces
- 4" dia swivel castors with the 2 rear braked
- Drop down footplate

Affinity Rise & Recline porter | features and options.

The Affinity is an excellent Riser Porter with good high get out positions. The standard chair comes with either 20 stone single or dual motor tilt in space actions. Bespoke sixes and actions with Variable Angle Lift (VAL) are available at extra cost.

The drop down legrest creates a compact design to support the feet whilst portering

The Affinity Rise and Recline Porter can be specified with all pressure Management options. Shown here is the Affinity Rise and Recline Porter with Air Comfort seat and back options.

The chair can be specified with an optional double height lateral support back cushion.

Affinity

Rise & Recline porter

The Affinity Rise and Recline Porter combines the functionality of a comfortable Rise and Recline chair with the added mobility of a wheeled porter chair. With the clever drop down footplate to support the feet when portering the chair is a very compact design.

primacare | always there

Ultra Low | specification.

		Standard
A	seat height	10 - 16"
B	seat width	10 - 34"
C	seat depth	12 - 24"
D	back height	12 - 30"
E	tilt / back angle	Single 25° / Dual 25° + extra 35°
F	overall width	Seat width plus 12"
G	overall depth	35"
H	overall height	39"
	weight capacity	20 stone

- Standard features**
- Choice of Single or Dual Tilt in Space Rise and Recline actions
 - Ultima vinyl Crib 5 with waterproof vapour permeable 4 way stretch fabric on all contact surfaces
 - 4" dia swivel castors with the 2 rear braked
 - Drop down footplate

Ultra Low | movement

Chair in normal seating position

Chair raised showing flat lift

Chair in rise position

Chair in tilt recline position

Ultra Low

The Ultra Low chair is designed for people of short stature who need comfortable tilt in space recline and a rising chair for help when standing.

The chair has seat heights from 10" upwards but with normal thickness's of cushioning making this a very comfortable chair, with weight capacities up to 25 stone.

The mechanisms are hidden in the arms of the chair to allow for the comfortable seating and pressure relieving options if necessary.

primacare | always there

Affinity *Bariatric Porter* | specification.

		Standard
A	seat height	16-22"
B	seat width	24-34"
C	seat depth	18-26"
D	back height	27-33"
E	back angle	40° plus 30° tilt
F	overall width	Seat plus 9"
G	overall depth	38"
H	overall height	Seat height plus back height minus 3"

- Standard features**
- BLTR action with separate control of Back, Leg, Tilt and Rise functions
 - Ultima vinyl Crib 5 with waterproof vapour permeable 4 way stretch fabric on all contact surfaces
 - Removable seat quilt system giving access to the seat foam block.
 - 4" Dia swivel castors with braked rear castors
 - 25 stone extra heavy duty leg rest
 - Flat vertical lift if required

Affinity *Bariatric Porter* | features and options.

The Bariatric Porter can be reclined and tilted to create an almost bed like flat position

This is a heavy chair and one career will only move the chair small distances with the user seated.

The Porter chair has a good high get out position

The chair can be raised 4" vertically

The Bariatric Porter shown on this page is the Affinity style chair. It is possible to make any style of chair using the BLTR Porter action but consideration should be given to the width of the arm assuming the Porter chair will have to go through doors

Affinity

Bariatric Porter

The Affinity Bariatric Porter has a weight capacity of 40 or 50 stone and uses the reliable BLTR actions.

This gives the user separate control of the Back angle, Leg rest, Tilt and Rise functions of the porter chair.

With chairs of this weight capacity the portering aspect is to allow the chair to be moved around without the user in the chair. It would be very difficult for 2 carers to move the chair with a 50 stone occupant

primacare | always there

Affinity *Mediatric* | specification.

Standard		
A	seat height	16-22"
B	seat width	18-30"
C	seat depth	18-26"
D	back height	27-33"
E	back angle	40° plus 30° tilt
F	overall width	Seat plus 9"
G	overall depth	38"
H	overall height	Seat height plus back height minus 3"

Standard features

- BLTR action with separate control of Back, Leg, Tilt and Rise functions
- Ultima vinyl Crib 5 with waterproof vapour permeable 4 way stretch fabric on all contact surfaces
- Removable seat quilt system giving access to the seat foam block.
- 20 stone heavy duty leg rest
- Flat vertical lift if required

Affinity *Mediatric* | features and options.

The Affinity chair using the BLTR action can be positioned in an infinite number of ways. Here the back angle is very upright with just a small use of the legrest.

The Affinity chair can be adjusted into an almost flat bed.

Even in the flat position the chair can be raised if necessary to help a carer not need to bend down.

The Mediatric chair shown on this page is the Affinity style chair. It is possible to make any style of chair using the mediatric 25 and 35 stone BLTR actions.

Affinity

Mediatric

The Affinity Mediatric Chair has a weight capacity of 25 or 35stone and uses the reliable BLTR actions.

This gives the user separate control of the Back angle, Leg rest, Tilt and Rise functions of the chair.

The chair is designed with a low construction height which allows for thick seat cushioning for extra comfort and longevity.

The removable seat system allows the provision of all of the pressure management solutions shown on page 3

primacare | always there

Affinity *Bariatric* | specification.

Affinity Bariatric chair with 2 optional drop arms and electric seat retraction

Standard		
A	seat height	16-22"
B	seat width	18-30"
C	seat depth	18-26"
D	back height	27-33"
E	back angle	40° plus 30° tilt
F	overall width	Seat plus 9"
G	overall depth	38"
H	overall height	Seat height plus back height minus 3"

- Standard features**
- BLTR action with separate control of Back, Leg, Tilt and Rise functions
 - Ultima vinyl Crib 5 with waterproof vapour permeable 4 way stretch fabric on all contact surfaces
 - Removable seat quilt system giving access to the seat foam block.
 - 25 stone extra heavy duty leg rest
 - Flat vertical lift if required

Affinity *Bariatric* | features and options.

Seat retracted

Optional electrically operated seat retraction which gives 6" seat depth adjustment

Seat extended

Drop arm lowered

Optional electrically extending legrest.

The Bariatric chair shown on this page is the Affinity style chair. It is possible to make any style of chair using the Bariatric 40 and 50 stone BLTR actions.

Affinity

Bariatric

The Affinity Bariatric Chair has a weight capacity of 40 or 50 stone and uses the reliable BLTR actions.

This gives the user separate control of the Back angle, Leg rest, Tilt and Rise functions of the porter chair.

The chair is designed with a low construction height which allows for thick seat cushioning for extra comfort and longevity.

The removable seat system allows the provision of all of the pressure management solutions shown on page 3

Adelphi

Care Chair

The Adelphi is a sister model of the successful Florence and Cabaret designs and uses the same frame with the same controls.

However the Adelphi back style uses soft cushioning and Conventional wings to give postural support, sometimes with optional extras such as soft lateral support cushions.

The Adelphi is available with manual or electric controls of the 3 main operations; leg rest, tilt and back angle.

Brecon & Monza

Contract Express chairs

Both chair styles come in 3 sizes, 3 colour ways and 3 action types and can be delivered very quickly.

The action types available are single tilt in space, dual motor and dual tilt in space, all with a 20 stone weight capacity.

Both chairs come as standard with fabrics to Crib 5 standard allowing their sale to, and use in, Care Homes and Hospitals.

Both chairs come with a removable seat system and 3 waterfall back cushions which can easily be adjusted to improve the comfort of the chair. Medium risk pressure relief foam is supplied as standard but the chairs can be specified with all pressure management options listed at the front of the brochure.

Monza Contract Express

Monza arm is narrower at the base allowing easier access for hoists and steadies
